

LEGENDA CAP:

- | QUESTION | ANSWER |
|---|--|
| 1. What is the main purpose of the study? | To investigate the effect of the new curriculum on the learning outcomes of the students. |
| 2. What are the research objectives? | To determine the level of student achievement, to identify the factors affecting student achievement, and to compare the learning outcomes of the students who were taught by the new curriculum with those who were taught by the old curriculum. |
| 3. What is the research hypothesis? | There is a significant difference in the learning outcomes of the students who were taught by the new curriculum and those who were taught by the old curriculum. |
| 4. What is the significance of the study? | The study is significant because it will provide valuable information about the effectiveness of the new curriculum and will help to improve the quality of education. |
| 5. What are the limitations of the study? | The study is limited by the sample size, the duration of the study, and the lack of control over the variables. |
| 6. What are the conclusions of the study? | The study concludes that the new curriculum has a positive effect on the learning outcomes of the students. |
| 7. What are the recommendations of the study? | The study recommends that the new curriculum should be implemented in all schools and that the Ministry of Education should provide more support for the implementation of the new curriculum. |
